- OSGi
- Shell commands
- Logging
- Dynamic configuration
- Monitoring
- Bundle management
- Features
- Tuning
- Advanced administration and troubleshooting exercises based on real-world scenarios

Course Description

5 Day Course

Each exercise follows a common format: Objective, User Story, Approach, followed by step-by-step instructions to complete the objective.

Courses are delivered on-site using the attendees own laptop or desktop.

All exercises are designed to be executed on the attendees' own system.

Note: Students wishing to use Mac OSX or Linux desktops may do so, but they will need to adapt environment and instructions to convert Windows paths and commands to UNIX.

Course Prerequisites

Windows 7 (or higher)

OpenJDK or Oracle JDK 1.8.0u161 (or higher)

Preferred text editor

Apache Maven 3.5.x (Instructor Provided)

HYTE Runtime (Instructor Provided)

 855-4-HYTE-IO

 sales@hyte.io
